KIP Software Apps Line-Up

KIP Print Management Solutions

KIP wide format systems comprise a range of monochrome and colour printing, copying and scanning solutions optimised for economical output. These solutions offer industry leading print speeds with high-capacity paper handling and high yield toner cartridges, as well as a wide range of features for greater productivity, media versatility, networkability and flexible system configurations.

A high level of automation, seamless networked production software and dependable cost controls are integrated into every KIP system to ensure your company's competitiveness now and in the future.

Table of Contents

KIP Touchscreen
Print, Copy & Scan

A large touchscreen makes KIP system operation simple, even for personnel without special training. All major system functions are available at your fingertips from a single interface. The on-board colour LCD touch-panel of KIP systems provides a powerful combination of control plus convenience – because you don't have to leave your printer to perform the command functions that make your work more productive.

The large display area provides plenty of room to control job queues, review system status, print from USB or network locations – and lets you take a large, full colour look at image files before you print, make changes and see your results immediately.

KIP Print
PC Based App

KIP Print network printing software is an easy to use application designed to provide operators with a fast and accurate means of producing high quality print sets from all types of wide format digital files.

An intuitive ribbon style interface puts emphasis on job building; featuring column browsing, colour thumbnail previews and total preflight control. Colour and B&W documents are efficiently selected for printing in collated sets with the ability to designate custom output preferences before print submission.

# KIP Web Based Apps

KIP PrintNET
Web Based App

KIP PrintNET is a true web-based print production tool that delivers powerful colour file viewing & printing, job queue management and administration features without the need to install any software applications on network computers. Users may select and send single or multiple files to KIP systems, complete with image adjustments such as scaling, stamping and colour management! In addition, KIP PrintNET generates email reports detailing system usage on demand or at designated intervals.

KIP Cloud Printing Web Based App

The ability to produce large prints using nothing more than an email with attachments and a few key words helps keep mobile clients on the go to stay productive.

- Use any phone, tablet, laptop or PC
- No need to install drivers or software applications
- No learning curve, no training
- Submit print ready files via email attachments
- Optional keywords provide enhanced flexibility

Certified KIP Application Drivers

Windows Certified Application Driver

The KIP Windows® driver is Microsoft WHQL certified, meaning the KIP Windows driver meets explicit standards of reliability and quality. The KIP Windows driver enables direct printing from Windows based applications and supports advanced features including set collation, fast spooling for multiple copies or sets, data tracking for job accounting and media selection.

- Windows 7 device experience
- Provides current media information
- Displays real time system status
- 64 & 32 bit operating system compatibility
- Job accounting and data tracking information

KIP Wide Format systems Line-Up

Award winning KIP printing and imaging technologies have been designed to enhance the operations of all KIP wide format digital printers and scanning systems. KIP software applications and advanced mechanical processes combine to enhance the quality of wide format document production, while decreasing operator effort and overall ownership costs.

A high level of automation, seamless networked production apps and dependable cost controls are integrated into every KIP system to ensure your company's competitiveness today and into the future.

KIP Eco-Friendly features

The greatest environmental impact of KIP products is through the actual operation of our products and solutions. We improve the customer experience by integrating environmental considerations into our business strategy – resulting in superior products.

Customers increasingly value environmental aspects of products, such as energy efficiency, emissions reduction and the ability to recycle exhausted supply containers. We differentiate our products by integrating such features to deliver a low total cost of ownership and an improved user experience.

- Energy Star Qualified
- ROHS Compliancy
- ISO 14001 Standards
- Ozone Emissions Filters
- UL/UL-C Approved
- 100% Toner Efficiency – No Waste Toner
- Organic, Recyclable Photoreceptors
- Recyclable Toner Containers
- Prints on Recycled Paper
- Automatic Image Rotation and Media Selection Ensure Minimal Paper Waste
